Abstracts

According to our (Global Info Research) latest study, the global Arc Sensor market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Arc sensors are based on detecting arc flash glare alone or detecting arc flash and simultaneous phase or neutral overcurrent. When an arc fault is detected, the arc fault protection system issues a trip command to all circuit breakers supplying power to the faulted area in less than 2.5 milliseconds. In addition, the operation indicators of the arc fault protection system guide maintenance personnel to quickly locate the fault area.
