Abstracts

The global Architecture Curtain Wall market size is expected to reach \$ million by 2032, rising at a market growth of %CAGR during the forecast period (2026-2032).

Architecture Curtain Wall is an outer covering of a building in which the outer walls are non-structural, utilized to keep the weather out and the occupants in. Since the curtain wall is non-structural, it can be made of lightweight materials, thereby reducing construction costs. When glass is used as the curtain wall, an advantage is that natural light can penetrate deeper within the building. The curtain wall facade does not carry any dead load weight from the building other than its own dead load weight. The wall transfers lateral wind loads that are incident upon it to the main building structure through connections at floors or columns of the building. A curtain wall is designed to resist air and water infiltration, absorb sway induced by wind and seismic forces acting on the building, withstand wind loads, and support its own dead load weight forces.

United States Architecture Curtain Wall key players include Oldcastle BuildingEnvelope, Permasteelisa, Apogee Enterprises, Inc, Kawneer Company, etc. Top four companies hold a share about 20%. In terms of product, Glass Curtain Wall is the largest segment, with a share over 55%. And in terms of application, the largest channel is commercial building.
