According to our (Global Info Research) latest study, the global Archive Storage Service market size was valued at US\$ 10801 million in 2025 and is forecast to a readjusted size of US\$ 15699 million by 2032 with a CAGR of 5.5% during review period.

Archive Storage Service refers to the outsourced preservation, indexing, storage, retrieval and lifecycle management of inactive business records. The service primarily covers paper documents, files, microfilm, magnetic media, legal records, medical records, engineering drawings and other information that must remain secure and accessible for regulatory, operational or historical reasons. Modern providers increasingly combine physical off-site storage with scan-on-demand, document digitisation, digital mailrooms, retention scheduling, secure transportation and authorised destruction.

This report focuses on commercial physical and hybrid archive storage services, rather than public archives, consumer self-storage or general-purpose cloud data storage.

North America remains the largest market because of early outsourcing adoption, extensive regulated-sector demand and the concentration of major providers. And strong healthcare, financial, legal and government demand.

Europe: Mature UK and Western European markets; increasing consolidation and GDPR-related governance demand.

Asia-Pacific: Faster growth in India, Southeast Asia, China and developed Asian financial centres.

Latin America: Growing outsourcing by banks, governments and multinational companies.

Middle East & Africa: Smaller but expanding market, led by government, energy, healthcare and financial institutions.
