According to our (Global Info Research) latest study, the global Argon Based Gas Blend market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Argon Based Gas Blends are mostly widely used for conventional and pulsed spray transfer on clean (little or no scale or residual oil), plain carbon and stainless steel. These blends, typically 1, 2 or 5% oxygen, provide good arc stability and very low levels of spatter and fume. Higher levels of oxygen will also increase puddle fluidity that may make out-of-position welding more difficult.
