Abstracts

The global Argon Based Gas Blend market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Argon Based Gas Blends are mostly widely used for conventional and pulsed spray transfer on clean (little or no scale or residual oil), plain carbon and stainless steel. These blends, typically 1, 2 or 5% oxygen, provide good arc stability and very low levels of spatter and fume. Higher levels of oxygen will also increase puddle fluidity that may make out-of-position welding more difficult.

This report studies the global Argon Based Gas Blend production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Argon Based Gas Blend, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
