They feature integrated protective armor in key areas such as the knuckles, fingers, and wrist to protect against impact and abrasion injuries in case of accidents. The armor is typically made of hard materials like carbon fiber, plastic, or metal to effectively absorb and distribute impact forces. Armored motorcycle gloves provide enhanced grip, dexterity, and tactile sensitivity while also offering essential protection to the hands during riding. They are an important safety accessory for motorcyclists to reduce the risk of hand injuries and improve overall riding safety.
