The global Armored Motorcycle Shirt market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Armored motorcycle shirt refers to a specialized garment designed to provide protection to motorcyclists while riding. It is typically made of abrasion-resistant materials like Kevlar or ballistic nylon and features built-in armor panels in critical areas such as the shoulders, elbows, and spine. The armor panels are usually made of materials like CE-rated impact foam or hard plastic to absorb and distribute the forces of impact in case of a fall or collision. The armored motorcycle shirt offers a convenient and versatile option for riders, as it can be worn as a standalone protective garment or as an additional layer under a jacket. It provides protection against abrasion, impact, and other potential injuries, increasing the safety and well-being of the rider on the road.
