Abstracts

The global Armored Vehicle Services market size is expected to reach \$ 7399 million by 2032, rising at a market growth of 4.7% CAGR during the forecast period (2026-2032).

Armored Vehicle Services refer to the secure transportation, escort, temporary storage, vault custody, ATM cash replenishment, and cash management services provided to banks, retailers, government agencies, precious metal companies, jewelers, casinos, ATM operators, and high-net-worth clients using bulletproof, riot-proof, GPS monitoring, electronic lock control, two/multi-person escort, armed or professional security personnel, etc.

The declining proportion of cash payments in developed markets has slowed the growth of basic cash transport; however, scenarios such as bank branches, ATMs, retail cash collection, gaming, precious metals, jewelry, and government bills still require high-security logistics. The merger of Armaguard with Prosegur Australia, which made Armaguard a major cash transport provider in the country, also reflects the consolidation of cash infrastructure towards a few large service providers.

This industry typically requires security licenses, armed escort permits, compliant vehicles, personnel training, and long-term bank client relationships, thus exhibiting clear regional monopolies or oligopolies. In China, armed escort companies are often subject to regional qualification restrictions, with many cities dominated by one or a few state-owned escort companies.
