Abstracts

The global Aromatic Polyols market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Aromatic polyols are built on the foundation of a phenolic core, known for its exceptional Fire, Smoke, and Toxicity properties. These polyols combine the attributes of aromatic polyesters and aliphatic polyether polyols in their significantly higher aromaticity and range of functionality, as well as their superior hydrolytic and chemical resistance. Due to their structural similarity, these polyols are naturally compatible with isocyanates and influence cell morphology.

This report studies the global Aromatic Polyols production, demand, key manufacturers, and key regions.
