Aronia Berry Concentrate Liquid is a high-purity liquid extract obtained from fresh aronia berry juice via low-temperature vacuum concentration, preserving most of the bioactive compounds such as anthocyanins (up to 2000-4000mg/100mL), proanthocyanidins, and organic acids. This deep burgundy-colored concentrate has an intense tart-sweet profile and can be diluted for direct consumption or used as a natural colorant and nutrient booster in beverages, jams, and liquid supplements. Compared to regular juice, it offers 5-10 times higher concentration of active ingredients with reduced water content for easier storage and transportation. Widely applied in functional foods, its antioxidant capacity (measured by ORAC) significantly surpasses blueberries and pomegranates, supporting cellular protection, eye health, and microcirculation improvement.
