## Abstracts

The global Artemisinin market size is expected to reach \$ 372 million by 2032, rising at a market growth of 19.5% CAGR during the forecast period (2026-2032).

Artemisinin is a natural compound extracted from the sweet wormwood plant (*Artemisia annua*), widely recognized for its potent antimalarial properties. It is effective in rapidly reducing malaria parasite levels in the blood and is a primary component of artemisinin-based combination therapies (ACTs), which are the standard treatment for malaria worldwide. Due to its effectiveness and rapid action, artemisinin has been a critical advancement in global malaria control efforts.

The artemisinin market is driven primarily by the global need to combat malaria, a disease that affects millions, especially in tropical and subtropical regions. As a key ingredient in artemisinin-based combination therapies (ACTs), the standard treatment for malaria, demand for artemisinin remains strong, especially in regions with high malaria prevalence. Increasing global health initiatives and funding from governments and organizations like the World Health Organization (WHO) and the Global Fund to Fight AIDS, Tuberculosis, and Malaria continue to support artemisinin production and distribution. Additionally, advancements in synthetic biology and semi-synthetic production methods are helping to stabilize supply.

The artemisinin market faces challenges such as dependency on seasonal agricultural production from *Artemisia annua*, which can lead to fluctuations in supply and pricing. Climate variability and agricultural risks can impact the availability and quality of raw material, causing potential shortages. Additionally, resistance to artemisinin is emerging in some regions, particularly in Southeast Asia, raising concerns over the long-term efficacy of artemisinin-based therapies. This resistance is pushing researchers and

health organizations to seek alternative treatments, which may impact future demand for artemisinin.

This report studies the global Artemisinin production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Artemisinin and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
