## Abstracts

According to our (Global Info Research) latest study, the global Articulated Mining Truck Gearboxes market size was valued at US\$ 202 million in 2025 and is forecast to a readjusted size of US\$ 269 million by 2032 with a CAGR of 4.1% during review period.

Articulated truck transmissions are core drivetrain components used in articulated dump trucks (ADTs). They primarily function to shift gears and amplify torque from the engine output to meet the demands of low-speed, heavy-load operations, frequent starts and stops, and complex terrain in construction sites and mines. They typically employ powershift or fully automatic transmissions, combined with a torque converter and planetary gear system to enhance smoothness and durability. In terms of price, they generally range from \$30,000 to \$120,000 per unit, with mainstream configurations concentrated in the \$50,000 to \$100,000 range. In 2025, the demand for articulated trucks will exceed 3,000 units.
