The global Articulating Bucket Truck market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Articulating bucket truck is a type of specialized vehicle used for aerial utility work and maintenance tasks. It features a hydraulic boom with one or more hinged joints, allowing it to extend and articulate to reach elevated work areas. The bucket truck is equipped with a bucket or platform at the end of the boom, providing a safe and stable working platform for technicians to perform tasks such as line maintenance, tree trimming, or electrical repairs at heights. The articulating design of the boom allows for greater flexibility and maneuverability in accessing difficult-to-reach locations.
