## Abstracts

The global Artificial Marble market size is expected to reach \$ 11520 million by 2032, rising at a market growth of 2.4% CAGR during the forecast period (2026-2032).

Artificial marble, also known as granite, is a decorative material made of natural marble or granite crushed stone as filling material, cement, gypsum or unsaturated polyester resin as adhesive, through mixing, molding, grinding and polishing. It has many characteristics of natural marble in appearance and performance, while overcoming some defects of natural stone. According to the type of material and manufacturing process, artificial marble can be divided into cement artificial marble, resin artificial marble, composite artificial marble and sintered artificial marble. Among them, resin artificial marble occupies a dominant position with its excellent performance, accounting for about 80% of the market. This material performs well in the field of interior decoration, has high waterproofness and elegant visual effects, and has become a widely used choice.

## Market Overview of Artificial Marble

Artificial marble is mainly used to manufacture bathroom products such as wash basins, bathtubs, wall panels and shower rooms. Its outstanding durability, waterproofness, antibacterial and stain resistance make it a representative of high-performance decorative materials. At the same time, its rich texture design can rival natural stone and meet the aesthetic needs of modern decoration. In the fiercely competitive environment of stone decoration, artificial marble maintains an unshakable market position in the bathroom field. The current global artificial marble market is highly competitive, with the top ten companies accounting for a combined market share of 12.67%. Major companies include LOTTE Chemical, LX Hausys, Guangdong Zhongxun

New Materials, Wanfeng Stone, etc. The technology research and development and product quality of these companies continue to drive market development.

### Market development trend of artificial marble

The production of artificial marble is concentrated in China, South Korea and Europe, while its sales market is spread all over the world. With the growth of demand in the construction industry and interior decoration, especially the preference for high-performance decorative materials in the modern bathroom field, the artificial marble market will continue to expand. Acrylic resin artificial marble is expected to occupy a larger market share in the future due to its superior performance and environmental protection characteristics. At the same time, the continuous improvement of production technology and design innovation make artificial marble more diverse and personalized. In addition, the global demand for sustainable development has also promoted the transformation of enterprises to green production and recycling, bringing new impetus to the development of the industry.
