According to our (Global Info Research) latest study, the global Artificial Marble market size was valued at US\$ 28960 million in 2024 and is forecast to a readjusted size of USD 48760 million by 2031 with a CAGR of 7.8% during review period.

Engineered stone is a composite material made of crushed stone bound together by an adhesive, (most commonly polymer resin, with some newer versions using cement mix). The two common stones used in producing these products are marble and quartz. The application of these products depends on the original stone used. For engineered marbles the most common application is indoor flooring and walls, while the quartz based product is used primarily for kitchen countertops. Related materials include geopolymers and cast stone. Unlike terrazzo, the material is factory made in either blocks or slabs, cut and polished by fabricators, and assembled at the worksite.

The global Engineered Stone industry is quite separated. The major manufacturers are concentrated in China, Europe, North America, such as DuPont, CXUN, Wanfeng Compound Stone and Vicostone.

This report is a detailed and comprehensive analysis for global Artificial Marble market.
