Artificial urinary sphincter is a device which is composed of silicone rubber that is preferred for the treatment of urinary incontinence. Urinary sphincter is a muscle which controls the flow of urine through your bladder. Artificial urinary sphincter (AUS) is used to control the flow of urine and is most commonly used in men. It is designed to supplement the function of natural urinary sphincter which restricts the urine flow out of bladder. Artificial urinary sphincter is an implantable, fluid-filled, solid silicone elastomer device. Artificial urinary sphincter is a standard treatment for male stress urinary incontinence, it is preferred as it provides discrete bladder control.
