Abstracts

According to our (Global Info Research) latest study, the global Artificial Wave Pools market size was valued at US$ 366 million in 2025 and is forecast to a readjusted size of US$ 529 million by 2032 with a CAGR of 5.1% during review period.

Artificial wave pools are purpose-built aquatic facilities that use mechanical, pneumatic, hydraulic, or other wave-generation technologies to simulate ocean-like waves in controlled pools or artificial water bodies. These systems can generate waves with adjustable heights, periods, shapes, and directions to support recreational surfing, professional training, competitive events, water sports education, and leisure entertainment. A typical artificial wave pool consists of wave-generation equipment, water circulation and treatment systems, control systems, safety facilities, and specially designed pool structures, with advanced systems capable of producing a variety of wave patterns, including continuous waves, intermittent waves, and barrel-style waves. In 2025, global Artificial Wave Pools production reached approximately 804 units, with an average global market price of around 442 k USD/unit, The production capacity for Artificial Wave Pools in 2025 was approximately 1000 units. The typical gross profit margin for Artificial Wave Pools between 20% and 40%.

The global artificial wave pool market is gradually transitioning from technology demonstration and pilot projects toward broader commercial deployment, with demand primarily driven by dedicated surf parks, water parks, tourism resorts, sports training centers, and large-scale entertainment complexes. The growing popularity of surfing, increasing demand for water sports in inland regions, and continued improvements in wave-generation technologies are supporting demand for high-quality, adjustable, and energy-efficient wave systems. Going forward, market competition is expected to focus
