The global Ascorbic Acid Anti-aging Agent market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Ascorbic acid (vitamin C) is a vitamin with antioxidant properties thought to play a role in the fight against aging. Antiaging ascorbic acid refers to skin care products or supplements that contain high concentrations of vitamin C and are used to reduce the signs of skin aging and improve the overall appearance of the skin. The use of ascorbic acid in skin care stems from its antioxidant properties. It neutralizes free radicals, which are caused by environmental pollution, UV exposure, and other external factors that can lead to skin damage and signs of aging. Ascorbic acid is also involved in the synthesis of collagen, an important protein that maintains the structure and elasticity of the skin. This report studies the global Ascorbic Acid Anti-aging Agent production, demand, key manufacturers, and key regions.
