According to our (Global Info Research) latest study, the global Aseptic (Sterile) Connector market size was valued at USD 700.4 million in 2022 and is forecast to a readjusted size of USD 1269 million by 2029 with a CAGR of 8.9% during review period.

Sterile (Aseptic) connector that are used across biopharmaceutical processes to connect two separate fluid paths with sterility assurance, even in unclassified environments.

Sterile connection is the critical 'communication,' or bridge, by which all the other pieces are made truly functional. Sterile connectors allow two lines of tubing to be joined while maintaining a sterile fluid pathway. Each line of tubing is pre-affixed to a connector end that has a removable membrane or valve barrier for mating to another connector end. Thus, the process line is maintained as closed and sterile even before a connection is made. Sterile connectors are designed to connect one processing stream to another, such as a container to a sampling line, media to a product vessel, or a filtration assembly to a filling line.

Global key players of Aseptic (Sterile) Connector include Pall Corporation, Merck, Sartorius and Colder Products Company (CPC), etc. The top four players hold a share about 60%.
