## **Abstracts**

Asphalt additives are substances added to asphalt to modify characteristic properties of asphalt binder. Primary reason for adding additives to asphalt is to increase the functional temperature range of asphalt. Viscosity of asphalt decreases at high temperature and increases drastically at low temperature. This hinders the usage of asphalt in roads, pavements, airfields, and parking lots made of asphalt. Usage of additives helps overcome this shortcoming. Additives are also used to enhance the binding property of asphalt by strengthening the asphalt aggregate bond. Furthermore, additives improve the film thickness of asphalt, thus preventing cracking, raveling, and deformation. This, in turn, reduces maintenance cost of asphalt-constructed structures. There are different types of asphalt additives. However, varieties that are primarily used include asphalt rubber, polymers, and chemical modifiers. Fibers and fillers are also used as additives in asphalt.

### **Scope of the Report:**

This report focuses on the Asphalt Additives in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The technical barriers of asphalt additives are relatively high, resulting in high level concentration degree. The manufacturing bases scatter around the world, mainly concentrating in Korea, China, Japan and USA. The key companies in asphalt additives market include. Evonik, Kraton, DuPont, Arkema, Sinopec, LCY CHEMICAL CORP. In 2015, the demand for asphalt additives in all regions is leveling off. The demand for these products will grow steadily.

In the past few years, the price of asphalt additives decreased and we expect the price

has pressure to increase in short time with new capacity released. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of asphalt additives. Therefore, to some extent, the companies face the risk of profit decline. The worldwide market for Asphalt Additives is expected to grow at a CAGR of roughly 3.9% over the next five years, will reach 5060 million US\$ in 2023, from 4010 million US\$ in 2017, according to a new GIR (Global Info Research) study.
