According to our (Global Info Research) latest study, the global Asset Management Systems market size was valued at USD 13740 million in 2023 and is forecast to a readjusted size of USD 23910 million by 2030 with a CAGR of 8.2% during review period.

Asset management is based on the collection, processing, storage, distribution and management of digital information technology, media enterprises for cross-media publishing and media asset reuse digital computer technology.

High deployment costs may prove to be a hindrance for SMEs in order to adopt these systems. Unavailability of skilled technicians or engineers to address technical and operational issues is expected to restrain asset management systems market growth over the forecast period. In spite of necessary security protocols, misuse or theft of sensitive data due to system vulnerability may raise privacy and security concerns, thereby inhibiting adoption.
