Assisted reproduction is the assistance provided to address infertility. All treatments of fertility in which handling of both egg and embryo is done are included in “assisted reproductive techniques (ARTs).” In these techniques, eggs from woman’s ovaries are surgically removed and combined in vitro with sperm and embryo is ultimately returned to the uterine cavity. ARTs therefore incorporate a wide range of procedures that are used to overcome natural barriers in fertilization by directly collecting and in vitro handling of human gametes and replacement of embryo into the uterus.
