According to our (Global Info Research) latest study, the global Apple Juice Concentrate market size was valued at USD 1508.4 million in 2023 and is forecast to a readjusted size of USD 1937 million by 2030 with a CAGR of 3.6% during review period.

Apple Juice Concentrate (AJC) is produced at 70-71 brix at low acidity from apples. This product can be used in fruit juices and tea.

The juice concentrate is processed to remove a defined proportion of the natural water content found in the fruit and produce a concentrated product which is smaller in volume. This can greatly reduce the costs required for transportation and the concentrate can, if required, be returned to its single-strength state by reconstituting with water once it reaches the final processing destination.
