Abstracts

Chronic obstructive pulmonary disease (COPD) is a general term that describes progressive respiratory diseases like emphysema and chronic bronchitis. COPD is characterized by decreased airflow over time, as well as inflammation of the tissues that line the airway.

Asthma is usually considered a separate respiratory disease, but sometimes it's mistaken for COPD. The two have similar symptoms. These symptoms include chronic coughing, wheezing, and shortness of breath.

Scope of the Report:

This report focuses on the Asthma & COPD in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Currently, North America leads the global market for asthma & COPD drugs and devices. North America was followed by Europe in terms of market capitalization. However, North America and Europe is expected to lose out some of the market share to other emerging regional markets owing to the expiry of several patents of pharmaceutical companies operating in these regions. Asia Pacific is expected to be the fastest regional market for asthma and COPD owing to the increased incidence of asthma & other respiratory diseases in industrial regions.

The worldwide market for Asthma & COPD is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.

Market Segment by Manufacturers, this report covers
