According to our (Global Info Research) latest study, the global Atmospheric Diving System (ADS) market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

The Atmospheric Diving System (ADS) is a small, single-person articulated submersible that is shaped like an armor. Compared to traditional submersibles, ADSs provide greater flexibility and maneuverability, allowing deep-sea divers to operate over a wider range and eliminating most of the physiological hazards associated with deep diving. The crew does not need to decompress, no special gas mixtures are needed, and there is no risk of decompression sickness or nitrogen narcosis. ADS is an indispensable and important equipment in rescue and salvage, underwater dam inspection and maintenance and other tasks. It is an effective means to ensure that divers can carry out underwater operations efficiently and reliably.
