According to our (Global Info Research) latest study, the global Atrial Fibrillation Devices market size was valued at USD 2986 million in 2023 and is forecast to a readjusted size of USD 5926.3 million by 2030 with a CAGR of 10.3% during review period.

Atrial fibrillation (also called AFib or AF) is a quivering or irregular heartbeat (arrhythmia) that can lead to blood clots, stroke, heart failure and other heart-related complications. Current treatments span a spectrum of non-invasive to highly invasive options and include medical and surgical variants. The success of the MAZE procedure and its successors has led to the development of surgical ablation devices designed to mark cardiac tissue in a manner similar to suture lines, thereby disrupting the path of the electrical impulses causing the patient's AF.

The leading manufacturers of atrial fibrillation devices include Abbott, Boston Scientific, Biosense Webster, etc, with the top 2 accounting for about 60%.

North America is the largest market with about 37%, followed by Europe with about 27%. In terms of product, catheter ablation is the largest segment, with a share over 88%. And in terms of application, the largest application is ambulatory surgical centers, followed by hospitals.
