Growth in the ADHD therapeutics market is mainly driven by granular impact of changing lifestyles and value systems impacting quality of births, increasing use of additives and preservatives in children's diet, rising prevalence of ADHD among children in the 4-17 year age group, increasing adoption of diagnostic guidelines (statistical manual of mental disorders) with low threshold for diagnosis of ADHD in other regions such as Europe and Latin America. Moreover, increasing awareness regarding ADHD among physicians and patients, and opinion-based diagnosis of ADHD owing to lack of standard diagnostic tests is expected to boost revenue growth of the global ADHD therapeutics market in the near future. However, existence of comorbid conditions in children leads to underdiagnoses of ADHD and less availability of non-stimulants ADHD drugs in various geographies. These are factors expected to restrain growth of the market over the forecast period.
