Abstracts

The global ATV & Side by Side market size is expected to reach \$ 28170 million by 2032, rising at a market growth of 4.3% CAGR during the forecast period (2026-2032).

In 2024, global ATV & Side by Side production reached approximately 1.8 million units, with an average global market price of around US\$ 11000 per unit. An all-terrain vehicle (ATV), as defined by the American National Standards Institute (ANSI), is a vehicle that travels on low-pressure tires, has a seat that is straddled by the operator, and has handlebars. As the name implies, it is designed to handle a wider variety of terrain than most other vehicles. The side-by-side (SxS) is a small 2- to 6-person four-wheel drive off-road vehicle, also called UTV (utility vehicle or utility task vehicle), a ROV (recreational off-highway vehicle), or a MOHUV (multipurpose off-highway utility vehicle). The gross margin for the ATV and SxS segment typically ranges between 20% to 30%. A single ATV & Side by Side production line typically has an annual capacity between 30,000 and 60,000 units.

The ATV and Side-by-Side (SxS) market has experienced significant growth over the past decade, driven by expanding recreational use, increased demand for utility vehicles, and advances in vehicle technology. These off-road vehicles have become popular across a wide range of consumers—from outdoor enthusiasts to farmers and industrial users—due to their versatility, ruggedness, and performance in various terrains. ATVs (All-Terrain Vehicles) are typically single-rider vehicles with handlebars, designed for off-road use. They are widely used for recreational activities such as trail riding, racing, and hunting, as well as for agricultural and industrial purposes. SxS (Side-by-Side Vehicles) feature side-by-side seating for two or more passengers. They are generally larger and more powerful than ATVs, often equipped with a roll cage, cargo bed, and advanced suspension systems, making them suitable for both work and

recreation. Outdoor activities have gained popularity globally, with consumers seeking adventure and off-road experiences. ATVs and SxS vehicles provide a unique way to explore rugged landscapes, boosting sales in developed markets such as the United States, Canada, and parts of Europe. In agriculture, forestry, and construction, these vehicles offer efficient transportation and hauling capabilities in challenging terrains. The growing need for cost-effective and versatile utility vehicles in these industries is fueling demand. Manufacturers are continuously improving engine performance, fuel efficiency, and safety features. The integration of electric powertrains is an emerging trend, addressing environmental concerns and regulations while appealing to eco-conscious consumers. Competitive events, clubs, and organized trail rides have contributed to increased interest and brand loyalty, encouraging repeat purchases and aftermarket sales. The ATV and SxS market is expected to maintain steady growth, supported by continuous product innovation and expanding applications. Electric and hybrid models are likely to gain traction, transforming the landscape with quieter, cleaner, and more efficient vehicles. Additionally, the growth of rental services, guided tours, and off-road parks is increasing access and consumer interest. The global ATV (All-Terrain Vehicle) and SxS (Side-by-Side) industry is supported by a sophisticated and multi-tiered supply chain that can be segmented into three core tiers: upstream, midstream, and downstream. The upstream sector encompasses fundamental research and development (R&D), design engineering, and the sourcing of raw materials and key components. This includes metals like steel and aluminum, polymers for body panels, and sophisticated subsystems such as powertrains (engines, transmissions), electronics (ECUs, wiring harnesses), and tires. The midstream tier is dominated by Original Equipment Manufacturers (OEMs) like Polaris, BRP (Can-Am), Honda, and Yamaha, who orchestrate the complex manufacturing and assembly process. They integrate components from a vast network of specialized suppliers to finalize the vehicles on dedicated production lines. Finally, the downstream segment focuses on distribution, sales, and the extensive aftermarket. This involves global logistics to ship vehicles to dealership networks, which handle direct sales, financing, and customer interaction. A particularly vibrant aftermarket industry provides a wide array of accessories, performance parts, and protective gear, while dedicated service and maintenance networks ensure vehicle longevity and customer satisfaction, forming a comprehensive ecosystem from concept to end-user and beyond.

This report studies the global ATV & Side by Side production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for ATV & Side by Side and provides market size (US\$ million) and Year-over-Year (YoY) Growth,

considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of ATV & Side by Side that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global ATV & Side by Side total production and demand, 2021-2032, (K Units)

Global ATV & Side by Side total production value, 2021-2032, (USD Million)

Global ATV & Side by Side production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Units), (based on production site)

Global ATV & Side by Side consumption by region & country, CAGR, 2021-2032 & (K Units)

U.S. VS China: ATV & Side by Side domestic production, consumption, key domestic manufacturers and share

Global ATV & Side by Side production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (K Units)

Global ATV & Side by Side production by Type, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

Global ATV & Side by Side production by Application, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

This report profiles key players in the global ATV & Side by Side market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Polaris, BRP, Honda, Kawasaki, Yamaha Motor, CFMOTO, John Deere, Hisun Motors, Kubota, Arctic Cat, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World ATV & Side by Side market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (K Units) and average price (US\$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
