Abstracts

Auger drilling is utilized in the construction of sewer lines and oil & gas pipelines in the construction sector. Auger drilling is primarily employed in sewer construction, as it helps accurately control the diameter of a sewer bore. Major customers of auger drilling machines in the construction sector are governments across the world. This technology is also utilized to mine coal, gold, and other minerals. Diesel or gasoline powered auger drills are generally used to extract coal and other minerals from the mine. Auger drilling is extensively employed in the mining sector owing to its low cost.
