## Abstracts

According to our (Global Info Research) latest study, the global Austenite Heat Resisting Steels market size was valued at USD 1580.5 million in 2023 and is forecast to a readjusted size of USD 1939.4 million by 2030 with a CAGR of 3.0% during review period.

The composition of these steels provide a long service life in dry gases at high temperatures (800–1150 °C), providing good resistance to oxidation rather than resistance to aqueous corrosion.

The steel industry is the core of global economic development, and the core of the sustainable development of modern society. In 2022, China's steel production declined year-on-year. In the first 11 months of 2022, China's crude steel production was 935 million tons, down 1.4% year-on-year, while steel production was 1.226 billion tons, down 0.7% year-on-year. Combined with the statistics of the Steel Association's ten-day report, it is expected that China's crude steel output for the whole year of 2022 will be 1.01 billion to 1.02 billion tons, down about 2% year-on-year. In the international market, global steel production declined year-on-year, and the global share of China's crude steel output increased. According to the World Steel Association, in the first 11 months of 2022, global crude steel production was 1.691 billion tons, down 3.7% year-on-year; the global share of China's crude steel production was 55.29%, up 1.31 percentage points year-on-year. According to the steel demand forecast released by the World Steel Association, global steel demand may grow by 1.0% in 2023.
