Automatic variable light liquid crystal welding mask is a new type of welding mask with light detection technology and liquid crystal technology. The working principle of the product is: the arc light generated by the induction welding of the photoelectric sensing circuit triggers the control circuit of the liquid crystal, and applies the corresponding driving signal to the liquid crystal of the mask according to the preset light transmittance. The liquid crystal ACTS as a light valve to change its transmittance, then filters the infrared and ultraviolet light produced by the welding, and reduces the strong light to the weak light that the human eye can bear. The LCD automatically become light welding mask market major producers: Lincoln Electric, Illinois, KimberlyClark, Cigweld, Optrel AG, 3M, Honeywell, ArcOne, KEMPER AMERICA, GYS, JSP, etc. Among them, Lincoln Electric is the world's leading supplier.
