## Abstracts

According to our (Global Info Research) latest study, the global Articulated Bus market size was valued at USD 7105.8 million in 2023 and is forecast to a readjusted size of USD 12830 million by 2030 with a CAGR of 8.8% during review period.

Articulated public transport is a member of public transport and belongs to the bus. It is usually designed as a single storey and includes two bus compartments. Its large capacity and high passenger capacity make articulated buses often used in rapid transit systems (BRT).

The growing popularity of articulated bus over conventional bus will drive the growth prospects for the global articulated bus market for the next four years. One of the major factors responsible for the growing popularity of bus transit is its cost-effectiveness that provides urban transportation needs such as comfort, reliability, accessibility, and ease of use. In addition, the market is witnessing a high rate of adoption of articulated buses over conventional bus due to the rising investment in bus rapid transit (BRT) systems. Furthermore, the benefits of articulated buses also allow authorities to reduce investment in transit modes like trams, which will again fuel market growth.

The Global Info Research report includes an overview of the development of the Articulated Bus industry chain, the market status of City Traffic (Single-decker Bus, Double-decker Bus), Township Traffic (Single-decker Bus, Double-decker Bus), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Articulated Bus.
