Abstracts

This report studies the auto lube Systems market, an auto lube system (ALS), often referred to as a centralized lubrication system, and is a system that delivers controlled amounts of lubricant to multiple locations on a machine while the machine is operating. Even though these systems are usually fully automated, a system that requires a manual pump or button activation is still identified as a centralized lubrication system.

SCOPE OF THE REPORT:

This report focuses on the Auto Lube Systems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Europe held the largest share of the auto lube system market in 2017. Leading industries such as automotive, mining, steel, electronics manufacturing, and agriculture have been flourishing in the European region for the past few decades. Need for more efficient output has encouraged the European industrial ecosystem to embrace automation and digitization. Increasing necessity to adopt efficient machinery and equipment, and maintenance practices has made Europe a huge market for auto lube systems. Furthermore, factors such as highly automated manufacturing industries, stringent environmental regulations related to the transportation industry, and increasing need to reduce maintenance costs are driving the growth of the auto lube system market in Europe.

The worldwide market for Auto Lube Systems is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
