According to our (Global Info Research) latest study, the global Auto Scaling market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Auto Scaling (AS for short) service provides customers with cloud server resource pools that can be scaled on demand to help customers flexibly respond to short-term high-concurrency scenarios such as events, promotions, and flash sales.

When business needs increase, AS will automatically expand cloud server instances or increase computing specifications for customers to ensure business capabilities; when business needs decline, AS will automatically reduce cloud server instances or reduce computing specifications for customers to save resource costs. Intelligent and flexible scaling services enable customers to maintain an appropriate amount of resources and provide healthy services no matter whether their business is in a fluctuating period or a stable period.

The Global Info Research report includes an overview of the development of the Auto Scaling industry chain, the market status of E-Commerce (Scale Up and Down as Planned, Alarm Triggered Expansion and Contraction), Game (Scale Up and Down as Planned, Alarm Triggered Expansion and Contraction), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Auto Scaling.
