Abstracts

The global Autocrane market size is expected to reach \$ 17990 million by 2032, rising at a market growth of 5.0% CAGR during the forecast period (2026-2032).

Autocrane means a lifting device incorporating a cable suspended latticed boom or hydraulic telescopic boom designed to be moved between operating locations by transport over the road.

The most basic type of mobile crane consists of a steel truss or telescopic boom mounted on a mobile platform, which may be wheeled (including 'truck' carriers). The boom is hinged at the bottom, and can be raised and lowered by cables or by hydraulic cylinders.

In this report, we mention the autocrane including rough-terrain crane, all-terrain crane and truck crane, do not include crawler crane.

XCMG, Liebherr, Tadano, Manitowoc and Zoomlion are the main manufacturers of autocrane, with the top 3 accounting for about 60% of the total market.

China is the largest production region, accounting for about 60% of the total market, followed by Europe and the United States.

This report studies the global Autocrane production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Autocrane and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering
