Abstracts

The global Automated Nucleic Acid Extraction Machine market size is expected to reach \$ 1357 million by 2032, rising at a market growth of 6.2% CAGR during the forecast period (2026-2032).

In 2025, global Automated Nucleic Acid Extraction Machine production reached approximately 19,000 units?with an average global market price of around US\$ 45,000 per unit, and a gross profit margin of approximately 20%-40%. Automated Nucleic Acid Extraction Machines are laboratory instruments used to automatically extract and purify DNA or RNA from blood, swabs, saliva, tissues, cells, pathogens, and other biological samples. These machines commonly use magnetic bead, membrane column, or automated liquid handling technologies to improve extraction consistency, reduce manual operation, and support downstream PCR, qPCR, sequencing, genotyping, pathogen detection, oncology testing, and molecular diagnostics. Compared with manual extraction methods, automated systems provide higher throughput, better reproducibility, lower contamination risk, shorter processing time, and stronger suitability for clinical laboratories, research laboratories, biopharmaceutical production, and public health testing. The industrial chain of Automated Nucleic Acid Extraction Machines includes upstream magnetic beads, extraction reagents, plastic cartridges, pipette tips, motors, pumps, magnetic rods, heating modules, sensors, control boards, software, robotic modules, and laboratory consumables. The midstream includes instrument design, liquid handling integration, magnetic separation module development, temperature control, software programming, assembly, calibration, contamination control testing, quality inspection, and certification. Downstream applications include hospitals, diagnostic laboratories, disease control centers, research institutes, biopharmaceutical companies, forensic laboratories, veterinary laboratories, food safety laboratories, and contract testing organizations. Related services include installation,

training, reagent matching, maintenance, software upgrades, calibration, spare parts supply, and after-sales technical support.
