## Abstracts

An automated tank cleaning machine is a machine used to clean cargo, process, underground storage tanks and similar equipment such as those found in tank trucks, railroad cars, oil tankers and etc. Tank cleaning by means of automated machines is often named "Butterworthing". Arthur Butterworth, in 1920, patented the first Automated Tank Cleaning Machine and in 1925 the company was established to produce and market this product. Nowadays there are several manufacturers of tank cleaning machines.

Scope of the Report:

This report focuses on the Automated Oil Tank Cleaning System in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The usable tank capacity is reduced by the volume of sludge. The tank operator needs then to clean the tank in order to re-establish its full capacity. In addition to this, national inspection regulations require a leak test every five or 10 years (double floor). To perform this inspection, the tank needs to be completely drained and cleaned. Repair work is often performed on this occasion. The petrochemical industry and tank terminals are increasingly choosing the option of automated rather than manual tank cleaning. One trend in the market is increasing market for tank cleaning systems as a service. Automated oil tank cleaning systems that not only clean the tank from inside but also extract hydrocarbons from the sludge have high upfront costs.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

United States will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Automated Oil Tank Cleaning System.

The worldwide market for Automated Oil Tank Cleaning System is expected to grow at a CAGR of roughly 3.8% over the next five years, will reach 370 million US\$ in 2023, from 290 million US\$ in 2017, according to a new GIR (Global Info Research) study.
