## Abstracts

An automated swimming pool vacuum cleaner is a unit that runs from an outside power source rather than your pool's filtration system. It is sort of like a Roomba for your pool. They run on wheels or tank treads and have removable filter bags that you take out and clean after each use. Automated swimming pool vacuum cleaners work independently from the filter and pump and are driven by an electric motor inside the unit. They are self-contained, collecting debris in a filter canister within the cleaner. Automated swimming pool vacuum cleaners have built-in intelligence that ensures they don't get stuck in corners and on steps and provide better coverage than alternative cleaners.
