According to our (Global Info Research) latest study, the global Automated Truck Loading System (ATLS) market size was valued at USD 89 million in 2023 and is forecast to a readjusted size of USD 213 million by 2030 with a CAGR of 13.3% during review period.

Automatic Truck Loading System (ATLS) is the first fully automated system to load or unload pallets, slip-sheets, racks, or other types of unit loads. Automatic truck loading and unloading always requires two 'combined' systems: one system in the truck and a 'fixed' installation inside the loading and unloading dock. When a truck docks the entire load is loaded or unloaded automatically. Automatic Truck Loading System allow increased efficiency. The most commonly used truck loading and unloading systems are for shuttle services between production facilities and distribution centres. Truck loading and unloading times are reduced from half an hour to a matter of minutes. Return on investment times are short due to the immediate savings compared to traditional loading and unloading (using fork-lift or hand pallets trucks).

Global automated truck loading system (ATLS) key players include Joloda International, Ancra Systems, Actiw Oy, BEUMER GROUP, TRAPO AG, etc. Global top 3 manufacturers hold a share about 45%. Europe is the largest market, with a share about 35%, followed by North America and Asia-Pacific. In terms of type, skate loader systems is the largest segment, with a share about 24%. And in terms of application, the largest application is logistics and transportation, followed by food and beverage, and automotive.
