According to our (Global Info Research) latest study, the global Automated Valve Actuators market size was valued at US\$ 9101 million in 2025 and is forecast to a readjusted size of US\$ 11556 million by 2032 with a CAGR of 3.4% during review period.

In 2025, global Automated Valve Actuators production reached approximately 6.16 million units, with an average global market price of around US\$1436 per thousand units. Automated Valve Actuators are devices used to automatically operate valves by converting an external power source such as electricity, compressed air, hydraulic pressure, or other control energy into mechanical motion. They enable valves to open, close, or modulate flow without direct manual operation and are commonly controlled by PLC, DCS, SCADA, or other automation systems.

The Automated Valve Actuators market is a critical segment of the industrial automation and flow-control sector, encompassing devices that enable valves to operate automatically without manual intervention. These actuators convert electrical, pneumatic, or hydraulic energy into mechanical motion to open, close, or modulate valves and are commonly integrated with PLCs, DCS, SCADA, or IIoT systems to enable precise, repeatable, and remote valve control. Key applications span oil and gas, chemical and petrochemical processing, water and wastewater treatment, power generation, mining, marine, pharmaceuticals, food and beverage, and general industrial manufacturing, where automated valve operation improves process efficiency, safety, and reliability. Upstream of the market, critical components include electric motors, hydraulic pumps, cylinders, solenoid valves, gearboxes, shafts, bearings, encoders, sensors, limit switches, seals, control electronics, and communication modules, all of

which influence actuator performance, accuracy, durability, and digital integration. Midstream, manufacturers assemble and calibrate a variety of actuators, including electric quarter-turn and multi-turn, pneumatic diaphragm and scotch-yoke, hydraulic linear and rotary, spring-return, double-acting, and fail-safe emergency shutdown units. Many products incorporate position feedback, torque and speed control, manual override, fieldbus and wireless communication, diagnostic software, and local control interfaces to enable smart, automated operation. Downstream, customers include valve OEMs, engineering procurement and construction (EPC) firms, system integrators, municipal utilities, industrial plant operators, and energy companies, with sales channels through direct project supply, distributor networks, service contracts, and after-sales support. The market is driven by industrial digitalization, infrastructure upgrades, process automation, regulatory compliance for safety and environmental standards, and increasing demand for precise, energy-efficient flow control. Looking ahead, automated valve actuators are expected to evolve toward more intelligent, compact, energy-efficient, and connected designs, integrating predictive maintenance, cloud monitoring, wireless communications, and advanced diagnostics. While electric actuators dominate for precision and integration with digital control, pneumatic and hydraulic actuators will continue to serve high-torque, fail-safe, and hazardous-environment applications. Market growth will be further supported by the modernization of chemical plants, water treatment infrastructure expansion, renewable energy projects, offshore oil and gas operations, and industrial plants seeking to reduce downtime, improve safety, and optimize energy consumption. Competitive dynamics will intensify as established global players focus on reliability, smart functionality, certifications, lifecycle services, and integrated valve-actuator solutions, while cost-competitive regional manufacturers expand in standard industrial and municipal markets. Overall, automated valve actuators are set to remain an essential technology in industrial automation, enabling safer, more efficient, and more intelligent valve operation across diverse sectors.
