## Abstracts

According to our (Global Info Research) latest study, the global Automatic Arc Suppression Coil Tracking Compensation Device market size was valued at US\$ 856 million in 2025 and is forecast to a readjusted size of US\$ 1249 million by 2032 with a CAGR of 5.0% during review period.

Automatic Arc Suppression Coil Tracking Compensation Device is a complete set of equipment applied to the neutral point grounded power grid through the arc suppression coil. It is mainly used to automatically detect changes in system capacitance current when a single-phase grounding fault occurs in the power grid, and adjust the inductance value of the arc suppression coil in real time to match the system capacitance current, thereby suppressing grounding arc, reducing overvoltage, and improving power supply reliability. This device usually consists of an arc suppression coil body, a grounding transformer, a control system, a detection unit, and a regulating mechanism, and is mainly suitable for distribution networks with voltage levels ranging from 6kV to 66kV. In 2025, global Automatic Arc Suppression Coil Tracking Compensation Device production reached approximately 10,209 Units, with an average global market price of around US\$ 84,507 per unit.

The annual production capacity of the arc suppression coil automatic tracking compensation device is 15000 units, with a gross profit margin of about 35%.

Upstream industries: electrical steel and copper enterprises, transformer and coil manufacturers, control system and relay protection equipment manufacturers, power electronic device enterprises, sensor and automation equipment manufacturers.

Downstream industries: power grid companies, substations, power plants, and new energy power stations.

The cost of core equipment accounts for about 45% to 55%; Electrical and control systems account for about 20% to 25%, material costs account for about 10% to 15%, production and assembly costs account for about 8% to 12%, and research and development and certification costs account for about 5% to 8%.
