Abstracts

Automatic baby swings are used as an alternative to keep babies engaged when parents are busy in household chores. Automatic baby swings help solve the problem of taking babies on lap, as they help keep the babies calm and occupied because of their natural swinging features. These swings are available in different varieties depending on the weight and age of babies. Modern baby swings have features like pre-installed music, including lullabies to entertain them. Also, different colored toys are attached to swings to draw the baby's attention.

Scope of the Report:

This report focuses on the Automatic Baby Swings in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In recent years, numerous portable automatic swings have emerged in the market and are accepted well by consumers. These swings are not recommended to be used once the baby's weight reach between 15 lbs and 25 lbs, and the baby starts to climb up.

The worldwide market for Automatic Baby Swings is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
