According to our (Global Info Research) latest study, the global Automatic Belt Tensioner market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The automatic tensioner has a coil spring inside that applies just the right amount of force against the belt to keep it tight. The tensioner also provides a little 'give' so it can absorb and cushion shock loads on the belt that occur when the A/C compressor clutch cycles on and off. What's more, the tensioner automatically compensates for wear and keeps the belt under constant tension.
