## Abstracts

The global Automatic Bias Cutter market size is expected to reach \$ 3034 million by 2032, rising at a market growth of 5.7% CAGR during the forecast period (2026-2032). Automatic bias cutters are one of the core pieces of equipment in tire manufacturing. They are specifically designed to cut polyester, nylon, aramid, and other fiber cords or steel cords to a fixed length, width, and angle with high precision and efficiency, according to the tire structure design requirements. In 2025, global Automatic Bias Cutter production reached approximately 16,037 units, with an average global market price of around 125 K US\$/Unit. The production capacity of Automatic Bias Cutter reaches 20,100 units, and the industry's gross profit margin is approximately between 20% and 40%.

The market demand for automatic bias cutters continues to rise, mainly driven by the rigid demand of the tire manufacturing industry to upgrade to high-efficiency, high-precision, and intelligent production lines. As radial tires have increasingly stringent requirements for cord fabric cutting dimensional tolerances, tension consistency, and angle control precision, traditional manual equipment can no longer meet the requirements of modern tire factories for yield rate and production cycle. At the same time, the boom in new energy vehicles has driven the expansion of high-performance tire production capacity, prompting companies to accelerate the deployment of automatic cord fabric cutting machines with servo control, automatic correction, intelligent material feeding, data traceability, and MES system integration capabilities. This report studies the global Automatic Bias Cutter production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Automatic Bias Cutter and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Automatic Bias Cutter that
