The global Automatic Cable Screen market size is expected to reach \$ 1221 million by 2032, rising at a market growth of 6.2% CAGR during the forecast period (2026-2032).

In 2025, global Automatic Cable Screen production reached approximately 16,250 units, with an average global market price of around US\$48,000 per unit.

The gross profit margin of major companies in the industry is between 18%-32%.

In 2025, the global production capacity of automatic cable screens was approximately 21,667 units.

Automatic Cable Screens are industrial screening and separation equipment designed to process cable waste and separate different material components such as copper, aluminum, and plastic insulation. These machines use mechanical vibration, air separation, and sometimes optical sorting technologies to achieve efficient material classification. Automatic cable screens are widely used in cable recycling plants, metal recovery facilities, and waste processing industries to improve material recovery rates and operational efficiency.

The industrial chain includes upstream steel structures, vibration motors, screening meshes, control systems, and sorting modules. Midstream manufacturing involves machine assembly, system integration, and performance testing. Downstream users include cable recycling companies, metal recovery plants, waste processing facilities, and environmental engineering projects. Supporting services include equipment installation, maintenance, and recycling system optimization.

The automatic cable screen market is expanding as demand for recycling and resource recovery continues to increase globally. The growing volume of electronic waste and discarded cables is driving the need for efficient separation and recycling equipment. Automatic cable screens improve material recovery efficiency and reduce labor costs, making them essential equipment in recycling plants. Technological advancements are focusing on improving sorting accuracy, automation level, and energy efficiency. However, fluctuations in recycled metal prices and investment cycles in recycling infrastructure may influence market demand. Overall, increasing emphasis on circular economy and sustainable resource utilization is expected to support steady growth in the automatic cable screen market.
