## Abstracts

According to our (Global Info Research) latest study, the global Automatic Container Handling market size was valued at US\$ 3409 million in 2025 and is forecast to a readjusted size of US\$ 4330 million by 2032 with a CAGR of 3.5% during review period.

Shipping containers revolutionized the movement of goods, driving change and efficiency throughout the global supply chain. The next revolution in container handling is the application of automation to operating the container terminal. At this time there are multiple automated container terminals in operation and more in development globally. The automation challenge has been in the part of the terminal where the containers are stacked, called the block. One end of the block services the ships being loaded and unloaded, and the other end services trucks and trains being loaded and unloaded.

The major 14 companies selected in the report occupy about 96.84% of the market share of the industry in 2019.
