Advanced emergency braking systems (AEBS), also referred to as autonomous and automatic braking systems, activates the brakes when a potential collision is detected and is highly effective in stopping or minimising the severity of a crash where the driver has failed to react. AEBS stands for Advanced Emergency Braking System, a driver-assistance system that monitors objects in front of the vehicle and makes sure they are of sufficient distance away from the vehicle. If the minimum safe distance is crossed, a warning is issued to the driver, and if the driver fails to brake in time, AEBS automatically engages the brakes to avoid a collision.
