According to our (Global Info Research) latest study, the global Automatic Emulsified Asphalt Equipment market size was valued at US\$ 1162 million in 2024 and is forecast to a readjusted size of USD 1515 million by 2031 with a CAGR of 3.9% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Emulsified asphalt equipment is a special equipment used to produce emulsified asphalt. Its characteristic is that under the action of emulsifier, the asphalt is broken into tiny particles by mechanical force and evenly dispersed in water to form a stable emulsion, namely emulsified asphalt. Emulsified asphalt is mainly used as a permeable layer, bonding layer and surface binder in highway and urban road projects, and is also suitable for the preparation of waterproof coatings and waterproof membranes in the construction industry.

According to research data from the company's 'Construction Machinery Research Center', the total sales of the top 50 global construction machinery manufacturers will reach US\$230 billion in 2022. Asian companies have an absolute advantage, accounting for 50% of sales revenue, followed by Europe. Sales revenue accounted for 26%, and North America accounted for 23%. The construction machinery of the world's top 50 main engine manufacturing companies sold approximately 1.2 million units of construction machinery and equipment in 2021, with sales increasing by 9%. China is currently the world's largest factory machinery market. In 2022, the sales of construction

machinery companies will account for 24% of total sales, making it the country with the highest proportion. According to data from the China Machinery Industry Federation, the operating income of the construction machinery industry in 2022 will drop by more than 12%. The operating income of China's construction machinery industry in 2022 will be 797.7 billion yuan. China's annual export volume will reach 44.3 billion US dollars, with a net increase in export volume in two years. amounted to US\$23.3 billion.
