## Abstracts

The global Automatic Glass Sealing Robot market size is expected to reach \$ 174 million by 2032, rising at a market growth of 10.0% CAGR during the forecast period (2026-2032).

An Automatic Glass Sealing Robot (for IGU) is an automated secondary edge-sealing system combining servo/CNC motion with metering?mixing?dispensing technology to apply sealants (e.g., 2K silicone, polysulfide, PU, hotmelt) around insulating glass unit edges (double/triple/step/facade IGUs). Its purpose is to deliver repeatable bead geometry and corner quality, improving airtightness/weather resistance while reducing manual variability. In 2025, global automatic glass sealing robot reached approximately 1201 units. Upstream for automatic glass sealing robot includes mechanical/motion modules (frames, linear guides, drives, conveyors, handling), controls & electrics (servo systems, PLC/IPC, HMI, sensors/safety), and the critical metering?mixing?dispensing unit (pumps/gear pumps, ratio control, mixing head, hoses, pressure/temperature control). A key process consumable is the IGU secondary sealant (2K polysulfide, 2K silicone/structural silicone, PU/hotmelt), supplied by companies such as Dow, Sika and Fenzi. Downstream customers are IGU manufacturers and flat-glass processors serving energy-efficient windows, curtain walls/structural glazing, jumbo and special-shape IGUs?where automated sealing improves bead consistency, corners, takt time and yield.

The growth in the automatic glass sealing robot market is primarily driven by automation adoption in glass fabrication and associated industries. Increasing demand from energy-efficient building materials, expanding construction and automotive production, and the industry?s shift toward fully automated, AI-enhanced robotic systems contribute significantly to market growth. Moreover, global manufacturing trends emphasize quality consistency, labor cost reduction, and high throughput, which further accelerates robot deployment across IGU production lines.

This report studies the global Automatic Glass Sealing Robot production, demand, key manufacturers, and key regions.
