The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Automatic Hydraulic Press is a machine that uses hydraulic pressure to compress materials into different shapes and sizes. It is commonly used in industries such as automotive, aerospace, construction, and manufacturing. The press is designed to apply pressure evenly to the material, which is placed between two plates. The plates then move together to compress the material, creating a desired shape or size.

The upstream industry chain of the Automatic Hydraulic Press includes the production and supply of raw materials such as steel, aluminum, and other metals. The downstream industry chain includes the industries that use the press to manufacture products such as car parts, airplane components, and construction materials. The distribution of the product's world market share by region shows that Asia-Pacific is the largest market, followed by North America and Europe.
